MAIN FEATURES

The filter mask for protection against particles is a complete respiratory protection equipment and it is intended to protect the user against the harmful effect of air pollution in the form of solid and / or liquid particles that constitute aerosols (dust, smoke and mist).

This mask does not eliminate the exposure to other contaminants. The incorrect use of it may cause diseases or even the death.

RECOMMENDED USES

Environments where harmful particles can be found in the air.

Descriptions, features, applications and pictures are provided as an example and they do not constitute a contractual commitment. The manufacturer reserves the right to include any appropriate changes.
